01 Global supply chain ecosystems 1

Introduction 1

Supply chain management has become strategic 3

Supply chains have become increasingly complex 7

Global supply chains for a connected world 15

Summary 23

02 Supply chain visibility 25

An introduction to supply chain visibility – what, why, where and how 25

Supply chain visibility is about ‘connecting the right dots’ 26

Technology – friend or foe? 29

What do we mean by IT systems in supply chains? 34

Commitment to integration is essential 37

Case study: How technology enables supply chain visibility 40

03 Sustainability and green supply chains 45

Positive environmental strategies for a sustainable supply chain 45

Drivers of a green supply chain 48

Practical steps to a green supply chain 56

Who can apply green supply chain and logistics programmes? 57

Educating staff on environmental awareness 58
Industry leadership 58
Case study: Green supply chains depend upon accurate
and complete data collection and analysis 60

04 Risk and supply chain resilience 65

Risk – building supply chain resilience for competitive
advantage 65
Evaluating the potential for risks
in the supply chain 67
Types of risk 70
Prevention vs preparedness 74
Features of a resilient supply chain ecosystem 75
Building supply chain resilience 77
Case study: Examples of supply chain risks and
contingency planning 82

05 Free trade for all – navigating the FTA landscape 85

Free trade agreements – economic necessity or
political minefield? 85
Who’s who in free trade? 87
International support for FTAs 88
A valuable South-east Asia perspective 90
What’s gone wrong with the WTO’s mission? 91
What now for the WTO and FTAs? 94
Can trade barriers be justified? 96
Tariff engineering, the new supply chain discipline 98
Critical factors when considering location 99
Case study: Best practices in effective customs duty
management 101

06 The Asian Era 107

The workers have become the shoppers 107
The Asian Era is here and now! 109
China at the crossroads? 116

The rising stars of ASEAN 121
Case study: Myanmar enters the world
of global trade 128

07 The New Silk Road connecting Europe and Asia 131

An historic trade route revived for
the 21st century 131
Deep-sea ocean freight 133
Will economic shifts boost the New Silk Road? 136
Asia-Europe by land transport 139
Governmental and organizational investment
and support 141
Barriers to Silk Road trade 142
Case study: China's \$40 billion Silk Road Fund 145

08 Integrated logistics hubs 149

Integrated logistics hubs enable global supply chain
ecosystems 149
Container ports as transit hubs 149
Integrated logistics hubs – leading examples 152
Logistics service providers connect the dots 161
Case study: SME freight forwarders connect integrated
logistics hubs via membership networks 164

09 Human capital – the talent pool 169

Human capital – the fuel that drives supply chain
ecosystems 169
Talent shortages in emerging markets 171
Human resource challenges and opportunities
in developed economies 172
Make training and development pay
at all levels 180
The changing labour market 182
Case study: Gender diversity in supply chain
and logistics 185
